SUMMARY

Frontend Developer with 1.5+ years of hands-on experience building and shipping production mobile apps and websites with React and React Native. Contributed to two published Play Store and App Store apps used by students, comfortable with MERN stack. Strong focus on clean UI, testing, and team workflows (Git Flow, Jira).

EXPERIENCE

Frontend Developer — WebAppick, Dhaka *Sep 2024 – Present*

- Build and ship production mobile apps with React Native and Expo in a team of senior developers, owning features from UI implementation through release.
- Developed core screens and features for two published Play Store apps (Gonit and Chintu), including practice flows, content readers, and user friendly UI.
- Designed and built REST APIs with Express.js and MongoDB (Mongoose) to power app content and user progress.
- Wrote automated tests with Jest and end-to-end tests with Maestro and Cypress to keep releases stable.
- Collaborate using Git Flow, code reviews, and Jira in an agile workflow.

PROJECTS

Gonit — Math Olympiad practice app [Play Store](#) [App Store](#)

- Built a Math Olympiad practice app for students in grades 1–10 using React Native, Expo, and NativeWind, backed by an Express.js and MongoDB API.
- Implemented question practice, answer checking, and progress tracking; published on the Play Store and App Store.

Chintu — Bengali stories and poems app for children [Play Store](#) [App Store](#)

- Built a children's reading app with React Native and Expo, delivering Bengali stories, poems, and quizzes from a WordPress REST API backend.
- Designed a simple, child-friendly reading experience; published on the Play Store and App Store.

SKILLS

Frontend: JavaScript (ES6+), TypeScript, React, Next.js, React Native, Expo, Redux, Tailwind CSS, NativeWind

Backend: Node.js, Express.js, MongoDB, Mongoose, REST API design, Firebase

Testing: Jest, Maestro, Cypress

Tools & Workflow: Git, GitHub, Git Flow, Jira, Figma
